1. UNIVERSAL PHONE HOUSING

1-1 Opening / closing the housing

1. Unlock the safety lock. As illustrated in figure<a1>,turn the locking disc "OPEN" in the same direction as in figure<a2>,and open the back cover.

⚠Attention! Be sure to push the red button outwards before rotating. Rotating it directly without pulling it out can damage the product.

2. Follow the opposite steps to close the rear cover and make sure that the latch is back in the locked position.

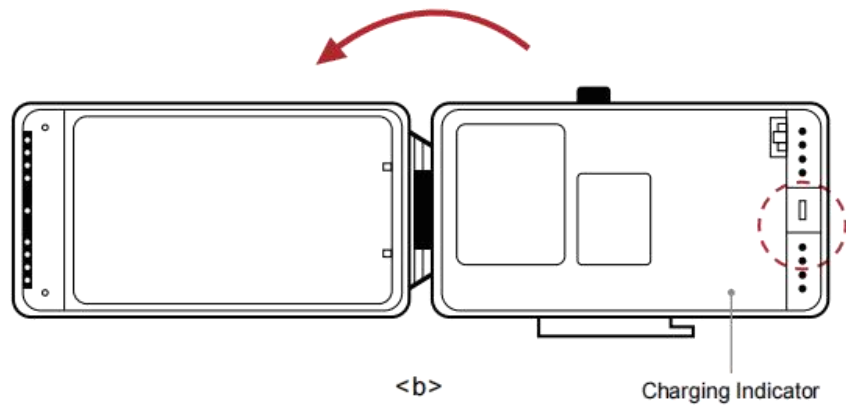

⚠Attention! After use, open the waterproof case upright. Otherwise, water may flow in from the outside of the case and allow water to enter the phone.

3. Connect the charging port correctly as shown in Figure

< 1 > Red light always on indicates that it is in charging mode.

< 2 > Green light always on indicates that the power is sufficient.

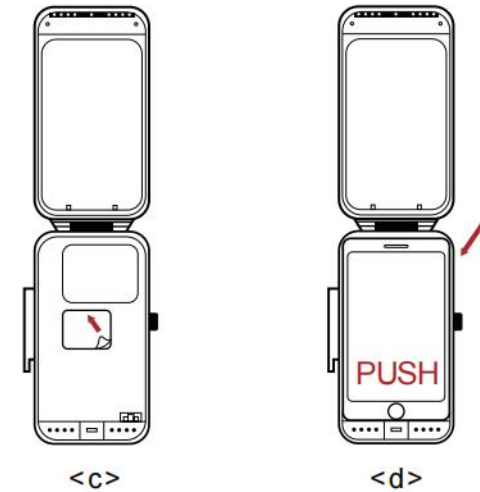

< 3 > Link your phone to display the remaining capacity of your device on the photo page.

4. Place the cell phone

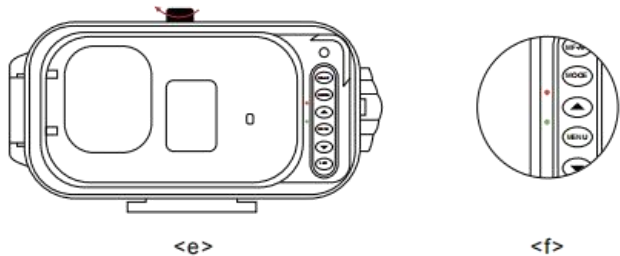

-As shown in figure < c >, tear off the fixed nano-glue protective film in the waterproof case.

-As shown in figure < d >, place your phone in the waterproof case, to make it fit firmly with the film.

1-2 IMPORTANT! Note: Please do the waterproof test before use.

- ① Be sure to open the waterproof case, and power it on, then close it before the waterproof inspection.
- ② Open the waterproof case and make sure all the O-ring is greased and in the correct slot position.
- ③ Unscrew the black vent hole cover <e>. Long press LED button to allow automatic air extraction for the device.
- ④ Red light will be on during venting, the device automatically pumps out for about 10 seconds when the green light is always on.
 - Red light is always on before venting.
 - Green light is always on when air extraction is completed.
 - And when the light is green then screw the black vent hole cover.
- ⑤ Leave the waterproof case on the land for 30 minutes, the device is safe and can be used underwater if green light is always on, otherwise, you are not allowed to use it underwater until it is repaired and the light is on correctly.
- ⑥ Use an empty watertight case for diving tests at depths of 10 m and above.
- ⑦ After the test, dry the surface of the waterproof case with a towel and check that the diving case is not soaked in water with the diving case closed.

1-3 Check if your smartphone is compatible

- ① The universal waterproof case is suitable for most Android / iOS smartphones.
- ② Applicable mobile phone size:
 - Length: 168mm / 6.6 inch
 - Width: 84mm / 3.3 inch
 - Thickness: 10mm / 0.4 inch

And the viewfinder window of the camera is 50 * 60mm / 2.0*2.4 inch.

***Smartphones that cannot be used with pop-out lenses**

2. HOTDIVE APP

New for HOTDIVE Universal Housing? Scan the QR code with your smartphone's camera and watch all the video tutorials before using it underwater.

3. Start Set-up

1. Unlock the safety lock, rotate it 90 degrees clockwise.

2. Remove the O-ring, check that there are no foreign objects, apply lubricating oil evenly, and then reattach it to the diving case.

3: Turn on the ON switch. Turn on the scan function of your phone, scan the 2D code inside the phone case, and install the app. Turn on bluetooth on your phone, turn on the software, click TO Dive to get device information, then click on device.

4. Place the cellphone in the case, unscrew the exhaust valve cap, close the latch and the red signal light was on.

5. Long press the LED button to activate the auto vacuum pump system, it will auto stop after about 10s with green light on , screw the valve cap. After use, unscrew the valve cap, take out the small valve, air in then red light on, then put the small valve in, open the case and take out your phone.

4. Notice for Product Safety and Product Information

1. Please do not remove the waterproof case without permission to avoid the damage caused by artificial disassembly and inability to be repaired.
2. Do not leave the waterproof case in direct sunlight or high temperature for long periods of time.
3. The sealing ring must be checked carefully before using this product to ensure that it is not damaged and no sand and other sundries are attached to it.
4. Do not open the waterproof case on the water.
5. After leaving out of the water, please be sure to wipe off the water on the surface of the case before opening it, so as to prevent the water droplets on the waterproof case from entering and damaging the internal parts.
6. After use, please be sure to wash the case in fresh water by shaking and soak it for 30 minutes to remove the salt and impurities attached to the product and avoid corrosion and rusting of metal parts. If the parts are rusted due to non-cleaning after use and waterproofing functions are affected, the maintenance cost must be borne by the customer.
7. Disconnect your phone and device from the Bluetooth list when changing your device or connecting

5. Warranty is Packed with Product

1. The warranty is 12 months from the date of purchase and the battery warranty is 6 months.
2. Please bring the product, customer receipt and warranty to the store if it breaks down under normal service condition as required in the instructions. HOTDIVE will repair it for you free of charge.
3. If you purchase it online, please consult the customer service for details.
4. No warranty will be provided in case of the following situations:
 1. You cannot present the warranty and the customer receipt at the same time.
 2. Failures and injuries caused by misuse or improper repair and modification, transportation, falls or natural disasters.
 3. Damage to the bar code of the product.
 4. Expired warranty period.
 5. Warranty and consumer receipt are the only ones, please keep them properly.
6. HOTDIVE reserves the right to change the mode of maintenance. If HOTDIVE products cannot be repaired in the country where they are located, you may need to bear freight and handling charges. If you make a request for maintenance in a country other than the country of origin, you shall comply with all applicable import and export laws and bear all duties, value-added taxes and other related taxes and charges.
